

Catering Questionnaire

Recently a questionnaire was conducted across the academy to collect student views regarding the school food provision.

The results have been analysed and some of the findings were:

- 70% of pupils rated the quality of food as good, very good or excellent.
- 83% of students felt the catering team were friendly and courteous.
- 75% of students rated the quality of taste of the food as good, very good or excellent.
- 70% of students rated the quality of the dining area as good, very good or excellent.
- 25% of students do not buy food because the queues are too long.
- 24% of students would like to see an improvement in the description of dishes.
- 47% Students would like to see more promotions/special offers.

Since these surveys have taken place a group of students have had a meeting personally with the academy's catering providers. They have discussed all the development and improvements they would like to see and as a result an action plan has been agreed. Some of this plan has already been implemented, for example, the queuing time has already been cut down due to the implementation of the biometric payment system.

A student catering committee has also been established consisting of two representatives from each year group. These will continue to represent the academy's views and help to develop the catering provision further.
